

Not a Chimp: The Hunt to Find the Genes That Make Us Human (Hardback)

Filesize: 6.43 MB

Reviews

Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Kian Harber)

NOT A CHIMP: THE HUNT TO FIND THE GENES THAT MAKE US HUMAN (HARDBACK)

DOWNLOAD

Oxford University Press, United Kingdom, 2009. Hardback. Book Condition: New. 218 x 132 mm. Language: English . Brand New Book. Humans are primates, and our closest relatives are the other African apes - chimpanzees closest of all. With the mapping of the human genome, and that of the chimp, a direct comparison of the differences between the two, letter by letter along the billions of As, Gs, Cs, and Ts of the DNA code, has led to the widely vaunted claim that we differ from chimps by a mere 1.6 of our genetic code. A mere hair s breadth genetically! To a rather older tradition of anthropomorphizing chimps, trying to get them to speak, dressing them up for tea parties , was added the stamp of genetic confirmation. It also began an international race to find that handful of genes that make up the difference - the genes that make us uniquely human. But what does that 1.6 really mean? And should it really lead us to consider extending limited human rights to chimps, as some have suggested? Are we, after all, just chimps with a few genetic tweaks? Is our language and our technology just an extension of the grunts and ant-collecting sticks of chimps? In this book, Jeremy Taylor sketches the picture that is emerging from cutting edge research in genetics, animal behaviour, and other fields.The indications are that the so-called 1. 6 is much larger and leads to profound differences between the two species. We shared a common ancestor with chimps some 6-7 million years ago, but we humans have been racing away ever since. One in ten of our genes, says Taylor, has undergone evolution in the past 40,000 years! Some of the changes that happened since we split from chimpanzees are to genes that control...
